

Microsoft 365 & Azure Cost Optimisation

AI-Powered FinOps Intelligence That Delivers 31% Average Cloud Savings

Transform your Microsoft cloud from cost center to strategic asset with real-time visibility, automated governance, and actionable insights.

Cloud Services

The Challenge

Your Azure and Microsoft 365 environments are critical to business operations, but without real-time visibility, they're expensive, underutilized, and full of hidden security gaps. Native Azure Cost Management tools show what you spent, not why you spent it or how to optimize. IT teams waste hours manually analyzing costs while Finance struggles with unpredictable cloud bills and unclear ROI.

Our clients achieve an average **31% reduction** in Azure and Microsoft 365 costs, with typical implementations identifying **£400,000+ in savings opportunities** within the first 21 days.

Key Benefits

Immediate Financial Impact

- Achieve 31% average reduction in annual cloud spend without compromising performance
- Identify and eliminate idle resources, zombie VMs, and redundant licenses within days
- Optimize Reserved Instance and Hybrid Benefit procurement with data-backed recommendations

Unparalleled Visibility & Control

- Real-time dashboards replace spreadsheets and rudimentary native reporting
- AI-powered tagging automatically assigns costs to business units, projects, and stakeholders
- Accurate forecasting and budgeting that Finance teams can actually trust

Enhanced Security & Governance

- Identify security gaps, misconfigurations, and compliance violations across your Microsoft estate
- Strengthen Zero Trust posture while reducing costs (no additional security tools required)
- Automated governance policies that enforce cost controls without manual oversight

Operational Efficiency

- Agentless, read-only deployment with 5-minute onboarding (no infrastructure changes)
- 200+ customizable dashboards deliver insights engineers and executives both understand
- Free your IT team from manual cost analysis to focus on strategic initiatives

Comprehensive Use Cases

For Finance Directors & CFOs:

- Eliminate budget surprises with accurate cloud spend forecasting
- Generate chargeback reports that allocate costs to business units and projects
- Track ROI by service, application, or department with automated cost attribution
- Prepare for quarterly board presentations with clear cloud investment metrics

For IT Directors & CTOs:

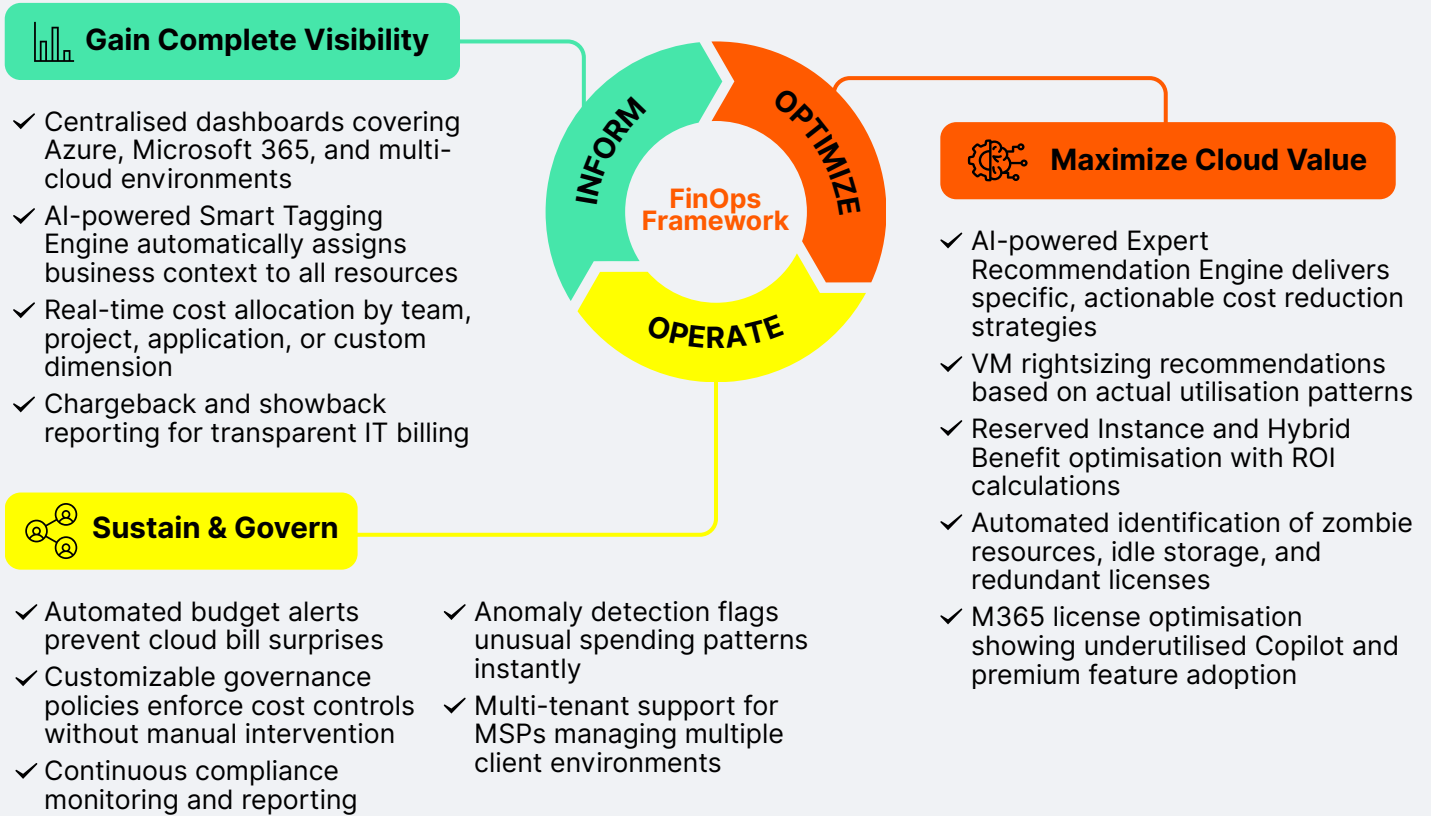

- Right-size VMs and services without performance degradation
- Identify and decommission orphaned resources automatically
- Optimise license allocation across the organization (eliminate shelfware)
- Plan infrastructure scaling with data-driven capacity forecasts

For Security & Compliance Teams:

- Identify exposed identities, misconfigured networks, and policy violations
- Generate compliance reports for PCI-DSS, ISO27001, CIS, and NIST frameworks
- Align cloud optimisation with Zero Trust security principles
- Reduce third-party security tool sprawl through integrated visibility

Capabilities: Organized by FinOps Framework

Why Aztech Delivers Better Results

Beyond Native Azure Tools: Native Azure Cost Management provides surface-level reporting. Our platform delivers in-depth governance, business context attribution, M365 optimization, multi-tenant support, and AI-powered recommendations that go far beyond Azure Advisor capabilities.

Feature	Azure Cost Management	Aztech FinOps Platform
Business context tagging	✔ Manual, static	✔ AI-powered, automated
M365 license optimisation	✘ Not included	✔ Full visibility & recommendations
Security posture integration	➡ Separate tools required	✔ Integrated Zero Trust alignment
MSP/multi-tenant support	➡ Limited	✔ Full partner capabilities
Recommendation depth	✔ Basic (Azure Advisor)	✔ AI-powered Expert Engine

Microsoft Solutions Partner Expertise: As a Microsoft Solutions Partner with 18+ years of enterprise IT experience, we don't just provide a platform. We implement, optimize, and support your cloud financial operations long-term. Our integrated teams combine IT infrastructure, cybersecurity, and cloud optimization expertise for joined-up solutions that actually work.

UK-Based with Global Reach: Supporting UK and international organizations from our offices in the UK, Cape Town, and Manila. 24/7 Technology Hub ensures real engineers are available round-the-clock for strategic planning and technical support.

Get Started: FREE Azure Health Check

Discover Your Savings Potential in 21 Days

Our complimentary Azure Health Check provides:

- Comprehensive assessment of your Azure and M365 environment
- Immediate identification of cost optimization opportunities
- Security gap analysis with prioritized recommendations
- Custom savings roadmap with ROI projections
- No obligation consultation with our Microsoft Solutions Partner team

Deployment is fast and non-disruptive:

- ✓ Agentless, read-only access (no infrastructure changes)
- ✓ 5-minute initial onboarding
- ✓ Full insights within 21 days
- ✓ Zero risk, immediate value
